

Siddartha Reddy Chamala

Hyderabad, Telangana, 500035 | chamalasiddarthareddy@gmail.com | +91 8341790918

Profile Summary

A highly motivated and detail-oriented cybersecurity enthusiast with a strong academic background in information security principles and technologies. Recently completed relevant certifications and hands-on projects to gain practical experience in threat analysis, network security, vulnerability management, and incident response. Skilled in using security tools and passionate about continuously learning and staying updated with the latest cybersecurity trends and emerging threats. Eager to contribute to securing organizational assets and networks while developing technical and analytical skills in a professional setting.

Education

AVN Institute of Education and Technology, B.Tech in Computer Science and Engineering – Cyber security Nov 2020 – June 2024

- GPA: 6.76

Sri Gayatri Junior College, Intermediate June 2018 – May 2020

- 6.4%

Lotus Lap Public School, SSC May 2018

- GPA: 7.5

Technologies

Languages: Java, SQL, HTML, CSS, React JS

Tools: Wire shark, Burp suite, information gathering Tools, Nessus,Acunetix ,Word, Excel, Power point

Technologies: Cybersecurity, Artificial Intelligence

Soft Skills: Communication, Teamwork, Problem-Solving, Active Listening, Conflict Management, Critical Thinking.

Projects

User Authentication System

- Developed secure user authentication policies incorporating methods like passwords, one-time passwords, hashing, and two-factor authentication to enhance security.
- Improved wireless communication security through advanced authentication techniques, including QR codes for enhanced data storage.
- Addressed vulnerabilities such as password sniffing by adopting solutions to make password cracking difficult for attackers.

Experience

Cybersecurity Intern, Supraja Technologies

- Gained hands-on experience in identifying and mitigating security threats while assisting the cybersecurity team in implementing robust security measures.
- My responsibilities included monitoring networks for vulnerabilities, performing risk assessments, and supporting the team in vulnerability testing and security audits.
- I contributed to ensuring data protection, safeguarding systems from potential breaches, and staying updated on the latest cybersecurity trends and best practices.

Courses / Certifications

Python Essentials - 1,2 by CISCO

Cybersecurity Job Simulation by Master Card
